### FUND HIGHLIGHTS

Our Investment Philosophy is predicated on the belief that great long-term investment opportunities can arise out of the market placing too much weight on negative near-term factors, often obscuring or ignoring the long-term true value of a company. We seek to take advantage of this near-term dislocation in price and value by buying companies that we believe have survivability in the near-term and the ability to thrive in the long-term.

To do this, we utilize the following approach:

**Asset-based Valuation Approach:** We estimate what we believe are reasonable valuations of a company's current net assets and are not reliant on potential future earnings generation ability.

**Bottom-up Portfolio Construction:** We build the portfolio from the bottom up, without index composition considerations. Holdings overlap with the index tends to be low and active share tends to be high.

**Concentrated Portfolio:** The Fund generally has a more concentrated portfolio (15-50 securities), allowing for a focus on higher-conviction ideas while still retaining diversification benefits.

**Focus on Well-Capitalized Companies:** We believe this attribute gives companies a better ability to survive during difficult periods and build value over the longer-term.

**Opportunistic Mandate:** We have flexibility in terms of where we can invest. We tend to find opportunities in less-followed companies across both developed and emerging markets.

**Long-term Investment Horizon:** We are long-term investors and seek to take advantage of stock price dislocations due to what we believe are transient factors.

**Flexibility on Cash Levels:** We hold cash when compelling opportunities are not plentiful, which allows us to buy quickly when sentiment swings and near-term market disruptions create opportunities.

### INVESTMENT OBJECTIVE

The Fund's objective is long-term capital appreciation.
